About This Game

Bunny Madness Anarchy is a fast-paced, competitive third person shooter. Build a team based on unique characters in order to crush your enemies. Face against each other in the intense Natural Selection mode, join forces to defeat waves of feral enemies, enraged by indoctrination in the Infected Madness Mode, dominate your competition by capturing points in Hostile Takeover, or bring back enemy supplies to your base in Supply Run. Over stunning environment, unique level design and original soundtrack you and your friends will immerse yourselves into a war-torn civilization of bipedal animals where the madness has taken over.

Features:

-Game Modes

-Each game mode includes local and online capabilities.

Infected Madness: Play against waves of Feral enemies. Battle solo or connect with up to 3 friends to help you survive the madness.

Natural Selection: Up to eight (8) players can enjoy this mode. Team composition is key to crush the opposing team.

Hostile Takeover: Capture three (3) different points around the map and dominate your opponents.

Supply Run: Infiltrate the enemy base to gather supplies and bring them back to your base.

-Characters

-Malice - is quick and a little mad. He eliminates his enemies with dual pistols which he compliments with a sonar pulse, so not one them may be spared.

-Ramree - his shotgun packs a punch and when combined with his stun grenade it is a deadly pair.

-Magnus -strong and focused he will annihilate you with his machine gun, flash grenade combination.
-Lucky - he will scope you out with his sniper rifle or blow you up with his landmine, there's no hiding from him.
-Alan - a veteran soldier with enough experience to eliminate any enemy with his assault rifle and grenade.

Each character has a species based combat mechanic. Unique stats based on damage, speed and health recovery, depending on the which character is chosen.

-Stages

All stages are playable in all game modes:
-The TSB Factory
-Training Station
-Alternate Reality
-Burrow City Hall
-Snow Wasteland
-Sequoia Forest Dam
-Downtown

-Original Soundtrack and SFX

A fusion of live instruments and digital effects make for a unique and highly engaging soundtrack.

Character and weapon skins unlocked by level progression.

This game is interesting, when you discover it. But 15 minutes later, you realize you've seen all and progression doesn't feel good.

It's very simple, probably it was designed for mobile (only 2 direction keys) - however there is still use for pointer in that all "purple virus blobs" (additional points).
There are no highscores nor Steam leaderboard, nor achievements.
It's not even relaxing... It's buggy - although notable, it's hard to describe.. Myself and two other friends bought and downloaded this game, and they have a multiplayer option on their menu screens and they can save their characters. The game looked really cool.

I CANNOT, SAVE, MY CHARACTER... I hover over save, I press space, and there is no save file of my character.
I can play the game as that character that I made but I cant load them back up, and if I change characters ingame to a new character my non-saved character dissapears, and I cant continue the game.

I CANNOT join a multiplayer game, This is my menu screen after loading the game [and re-installing again to try and fix?] [https://gyazo.com/4e7a98e614e4cc2c76cc8f3da8b7b063]

Can't save, can't play with my friends. I have windows 10, they dont.

please fix?. Fastest purchase I ever made and I was not disappointed. I won't recommend this game. Do not waste your money into this.. If you played earlier versions of this game and found them lacking in some way, you might want to give it another try (v. 1.016). I have played a game in the Competive AI mode for quite a few hours now and have built a substantial base. Gone are the crashes and game critical bugs. It is a good balance between real Mars simulation and game play. Overcome the challenges our first actual settlers to Mars will face - in 10 years or so! I especially like tearing up and down the Martian mountains and through narrow valleys via my trusty rover. It is civilization-building in a life threatening environment at its best (think The Martian). Graphics and tutorial could use further improvements, but Mars terraine and inside base scenes are already great, and I'm confident the game will continue to evolve and develop. For just $8+, this is your chance to get in on the ground floor of what your constructive suggestions could make into a very popular game.. I had this for the PS1 so I bought it for the nostalgia. I loved it back then, but on a keyboard today this is impossible. If you didn't own this back in the day, if your not into a difficulty that's so bad it's borderline impossible and not into kinda crappy old games, then stay as far away from this as you can.

This is really dull.. good idea funny and some what fun. Pros:

- Great graphics
- Good hiding mechanics & jumpscare animations
- Great design of animatronics

Cons:

- Bad ending
- The animatronics, especially the Wolf's & Cat's AI can be broken at times (such as being stuck walking towards objects, and related as such). This game reviewed well on PSVita for a reason. Very polished, lots of mechanics, large dungeons, job changing. It's a good grid based dungeon crawler, well worth the asking price.

The port quality is "ok". On one hand, there are no graphics options to speak of, on the other, the game easily accepted 4k resolution via NVidia DSR, so it looks incredibly clean and runs at a rock solid 60fps. I've seen far worse efforts.

If you are looking for a game in this genre, at least wishlist this. But given the launch promo it's already at a super acceptable price. Even if you have disliked previous Compile Heart games, check this one out.. GOOD DANGIT HOLY NATURE , i got sume real fat grizzly bears here , iiiiiiiiiiihooooooooo LIVE ACTION IHAAAAA!
